### **DETAILED ACTION**

1. This is the first office action on the merits. Claims 1-12 and 15-25 are pending and under consideration.

#### ***Specification***

2. The Specification as amended claims priority to US applications wherein the Applicants should update the status of each priority document.

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-12, 15, and 17-25 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,774,104 B1 ('104). Although the conflicting claims are not identical, they are not patentably distinct from each other

Art Unit: 1654

because those claims of '104 teaches in claims 16-19 the treatment of the instantly claimed fungal diseases of instant claims 24-25. '104 teaches the compositions, concentrations and formulation for treatment in claims 1-15 which render obvious the instantly claimed compositions, concentrations and formulations of the instant claims 1-12, 15 and 17-23. '104 teaches the use of lactose, sodium chloride and pH adjusters within the instant ranges and formulations. The species of '104, i.e. lactose, renders obvious the instantly claimed compositions.

### ***Claim Objections***

5. Claim 16 is objected to for depending from rejected claim 1.

### ***Conclusion***

6. No claims are allowed.
